OPEN JOURNAL
SYSTEM

Ръководство за потребители

Open Journal Systems (OJS) е платформа за разпространение на текстове, които са в процес на обработка както и за готови онлайн публикации.

Благодарение на интеграцията потребителите, които използват двете системи, могат да:

- управляват интегрираните системи чрез един акаунт в OJS;
- изпращат документи за антиплагиатски анализ само с едно кликване;
- получават Доклада за Сходство в акаунта си в OJS.

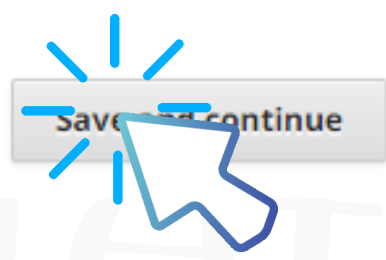

Преди да използвате плъгина, трябва да създадете заявката и да качите файла.

The screenshot displays the OJS (Open Journal Systems) interface for submitting an article. On the left is a dark sidebar with navigation links: **New Submission** (highlighted with a blue box), Submissions, Issues, Settings, Users & Roles, Tools, and Statistics. The main content area is titled "Submit an Article" and features a progress bar with five steps: 1. Start (active), 2. Upload Submission, 3. Enter Metadata, 4. Confirmation, and 5. Next Steps. Below the progress bar, the "Section Policy" is noted as "Section default policy". The "Submission Requirements" section includes a warning to read and acknowledge requirements before proceeding, followed by a list of checked items: the submission has not been published elsewhere, the file is in an accepted format (OpenOffice, Word, or RTF), and references have URLs. A modal window titled "Upload Submission File" is open, showing its own progress bar with three steps: 1. Upload File (active), 2. Review Details, and 3. Confirm. The modal contains a dropdown menu for "Article Component" set to "Article Text", a dashed box for file upload with the text "Drag and drop a file here to begin upload", and an "Upload File" button highlighted with a red border. At the bottom of the modal are "Continue" and "Cancel" buttons.

List of possible text manipulation attempts

In this section, you can find information regarding text modifications that may aim at temper with the analysis results. Invisible to the person evaluating the content of the document on a printout or in a file, they influence the phrases compared during text analysis (by causing intended misspellings) to conceal borrowings as well as to falsify values in the Similarity Report. It should be assessed whether the modifications are intentional or not.
