Enable

Show report to students

Enable our plugin for the created assignments and select whether you keep Similarity Report available or unavailable for the students for that particular Assignment. The verification process will start immediately once the documents are uploaded by the students.

Click on StrikePlagiarism icon in a Navbar to see the Submissions and Similarity Reports.

The screenshot displays the D2L Brightspace interface for a course named "Plagiat Course 1". The top navigation bar includes the D2L logo, course name, and user information for "Plagiat Instructor1". Below the navbar, a row of icons represents different course functions: Content, Course Tools, Assessments, and StrikePlagiarism. The StrikePlagiarism icon, which shows a document with a red checkmark, is circled in red. Below this row, the breadcrumb "Assignments > Course 1/1 > Submissions" is visible, followed by the main heading "Course 1/1 - Submissions".

Under the heading, there are three buttons: "Edit Assignment", "Add Feedback Files", and "Submission Log". Below these are tabs for "Users" and "Submissions", with "Submissions" being the active tab. A search bar is present with the text "Search For..." and a "Show Search Options" link. To the right of the search bar are tabs for "Assignments" and "Submissions".

Below the search bar, there are four action icons: "Download", "Mark as Read", "Mark as Unread", and "Delete". A table of submissions is displayed with the following columns: "Submission(s)", "Submission Date", "Author / Title", and "Uploaded at". The first row shows a submission titled "test EN.docx (19.64 KB)" with a submission date of "Jan 13, 2023 8:28 AM".

A dropdown menu is open over the "Author / Title" column, showing a search bar and a list of course options: "Course 1/1", "All assignments", "Course 2", "Course 3", "Course 4", "course 5", "Course 6", and "Course 1/1".

This is a list of Submissions. By clicking on Search you can search an author or a document title, by clicking on a field next to it you can choose a course you are interested in.

The screenshot shows a submission list with the following columns: Author / Title, Assignment Name, Uploaded at, Viewed, SC1, Status, and Report. Annotations include: 'Document title' pointing to the search input; 'Choose course' pointing to the course dropdown; 'Search for an author or a document title' pointing to the search button; 'Student has already viewed report' pointing to an eye icon; 'Similarity Coefficient and its score' pointing to the SC1 column; 'Click on this icon to open report' pointing to a report icon; 'Student did not open report' pointing to a crossed-out eye icon; and 'Status of document verification by the system. Document is checked or being checked.' pointing to checkmarks and a loading spinner.

List of possible text manipulation attempts

In this section, you can find information regarding text modifications that may aim at temper with the analysis results. Invisible to the person evaluating the content of the document on a printout or in a file, they influence the phrases compared during text analysis (by causing intended misspellings) to conceal borrowings as well as to falsify values in the Similarity Report. It should be assessed whether the modifications are intentional or not.

Characters from another alphabet	β	35	^ ▾

Record of similarities

Please note that high coefficient values do not automatically mean plagiarism. The report must be analyzed by an authorized person.

Within academia, plagiarism by students, professors, or researchers is considered academic dishonesty or academic fraud, and offenders are subject to academic censure, up to and including expulsion. Some institutions use plagiarism detection software to uncover potential plagiarism and to deter students from plagiarizing. Some universities address the issue of academic integrity by providing students with thorough orientations, required writing courses, and clearly articulated honor codes. Indeed, there is a virtually uniform understanding among college students that plagiarism is wrong. "Nevertheless, each year students are brought to their institutions' disciplinary boards on charges that they have misused sources and try to cheat in their schoolwork." [23]

However, the practice of plagiarizing by use of sufficient word substitutions to exclude detection software, known as rogeting, has rapidly evolved as students and unethical academics seek to stay ahead of detection software. [24]

Despite phenomenon of plagiarism is very sensitive in academic soc no much done to move forward with academic integrity in many co reasons are various: lack of legislation and regulations, poor practice implemented etc. Within last few years the plagiarism scandals beca
