OJS

OPEN JOURNAL
SYSTEM

Installation Manual

Open Journal Systems (OJS) is an editorial workflow platform and system for online publication. The StrikePlagiarism plug-in created for the OJS System allows users to send documents for antiplagiarism analysis and receive a Similarity Report directly through the user's OJS account.

The plugin we have made available works with OJS version 3.3.1.0 and newer.

1. Installation of the plugin

StrikePlagiarism.com customer Service provides a .rar file, which contains a plug-in file and an instructions in English. Installation can be done in two ways:

1. you need to copy the contents of the plugin to the plugins / generic / plagiarism folder.

To do this you need to create a folder plagiat (for example: *mkdir plagiat* and then use *git clone <repo_url>* or *git clone <repo_url > plagiarism* and the folder will be created).

Then you should run the command *php tools / upgrade.php upgrade* from the OJS root directory.

2. download the plugin and install the downloaded file via the website, by going to:

Administration -> Site Settings - under Plugins - you should click upload a new plugin in the next step you need to upload the downloaded file and install it, then run the command `php tools / upgrade.php upgrade` from the OJS root directory.

Then, in Administration -> Site Settings - in the Plugins tab, activate the installed plugin (refresh the page if necessary).

The screenshot displays the Open Journal Systems (OJS) administration interface. The top navigation bar includes 'Open Journal Systems', 'Tasks', 'English', 'View Site', and 'admin'. The left sidebar contains the 'Administration' menu. The main content area is titled 'Site Administration' and includes a 'Site Management' section with a 'Site Settings' link. A red arrow points from 'Administration' to 'Site Settings'. Below 'Site Settings' is the 'Administrative Functions' section with links for 'System Information', 'Expire User Sessions', 'Clear Data Caches', 'Clear Template Cache', and 'Clear Scheduled Tasks'. The 'Settings' section is active, showing 'Site Setup', 'Appearance', and 'Plugins' tabs. A red arrow points from 'Site Settings' to the 'Plugins' tab. The 'Plugins' tab displays a table with columns for 'Name', 'Description', and 'Enabled'. A red box highlights the 'StrikePlagiarism.com' plugin, which is currently disabled (checkbox is unchecked). Below the plugin name are 'Delete' and 'Upgrade' buttons.

Name	Description	Enabled
StrikePlagiarism.com	StrikePlagiarism.com plugin	<input type="checkbox"/>

2. Plugin configuration

In order to use the plugin properly, after installing it, you need to enable it in the admin account in OJS for a particular journal under Settings - \> Website, under Plugins- In the Installed Plugins list, you will see the plugin in Strikeplagiarism.com.

The screenshot illustrates the configuration process for the StrikePlagiarism.com plugin in the OJS admin interface. The interface is divided into a left sidebar and a main content area. The sidebar contains a 'Settings' menu item, which is expanded to show 'Journal' and 'Website' options. The 'Website' option is selected, leading to the 'Website Settings' page. In this page, the 'Plugins' tab is active, showing a list of installed plugins. The 'StrikePlagiarism.com' plugin is listed with a 'Settings' button next to it. A red arrow points from the 'Settings' button to a modal dialog box titled 'StrikePlagiarism.com'. The modal dialog contains the following text: 'Strikeplagiarism.com is a commercial antiplagiarism system. It is a Saas with API service available. Supported file formats - PDF, DOC, DOCX, RTF, ODT, TXT, HTML etc. This plugin requires purchased subscription. For more information or API key for plugin please an send email to contact@strikeplagiarism.com'. Below this text is an 'API key' input field, followed by the note 'API key is generated by StrikePlagiarism.com Customer Service Department'. At the bottom of the modal are 'OK' and 'Cancel' buttons.
